LICENSE PLATE READER (LPR)

SAVE MONEY USING LICENSE PLATES AS THE CREDENTIAL

DITCH THE STICKERS AND LONG RANGE READERS....

...THERE'S A NEW (OLD) CREDENTIAL IN TOWN

The license plate or "tag" has been around for decades... but now new technology is blowing the dust off and disrupting the market with the old hardware. Why spend money on credentials for your residents when your residents provide their own?

Parking Entry Captured Photo :

Parking Entry OCR Captured Photo :

The high speed LPR camera captures a clear image of the rear license plate.

- It opens gate in less than 2 seconds, if it the plate is not recognized, the gate will not open.
- Residents can add guests thus eliminating long lines at the gate.
- Resident is notified by text upon guest entry.
- Management has a log of all vehicle entries available in the portal for 90 days.

RESIDENT TAGS AND CREDENTIALING GUESTS FROM THE APP

From our intuitive app the resident can self enroll their own vehicles ...one less task for property managers.

The resident can add guests to enter the property via the resident lane with a “single” visit, “limited” up to nine times or “unlimited” with an expiration date.

FREE UP THE GUARD WITH PRE-REGISTERED GUESTS

CUT WAIT TIMES

Eliminate long lines at the guard house. With the resident now being able to add their guests tag number in their app, the guest will be able to enter the property through the resident lane eliminating the need to stop and be verified by the guard.

Now the guard will only need to process service providers coming into the property dramatically lowering wait time.

i.e. deliveries, lawn services, etc...

SAVE MONEY

In most gated/guarded communities 8pm to 8am are the quietest.

By using the license plate reader and the MyDoorView panel, a community could eliminate the overnight guard and **save \$50K** per year.

That savings can be put towards another Rover or even a Medic Rover. What could your HOA do with an extra fifty thousand dollars per year?
